Summary

Full-stack developer with a passion for technology and coding. Skilled in frontend (CSS, HTML, ReactJS, NextJS) and backend engineering (NodeJS, ExpressJS, GraphQL, Flask, API integration, and cloud engineering). Proven track record of delivering projects with efficient and effective solutions. Balances work and play, constantly exploring new development tools and staying up-to-date with the latest technologies. Enjoys playing piano and learning new languages in free time.

Experience

[b] Full Stack Developer (MERN) | Flutter

Bindr

Nov 2021 - Present (1 year 5 months)

- Contributed to the development of the product's user interface using ReactJS/TypeScript, resulting in improved user experience and seamless integration with NodeJS/TypeScript backend.
- Assumed a pivotal role in integrating the stream chat and chat user interface.
- Successfully delivered priority tasks and fixed bugs ahead of the submission deadline.
- Designed and implemented the onboarding flow user interface and its integration with the backend for mobile devices using Flutter.
- Currently serving as a versatile Full Stack and Mobile Developer, leveraging expertise in ReactJS/TS, NodeJS/TS, and Flutter to enhance product UI and seamlessly integrate with the backend.

Back End Developer

SKUPREME

Jun 2021 - Present (1 year 10 months)

- Successfully integrated APIs of Reverb, Google, Bigcommerce, and Facebook with serverless architecture
- Designed and implemented data analytics solutions using MongoDB and AWS Lambda
- Developed and maintained API documentation using Swagger
- Demonstrated expertise in using AWS services, including Lambda and MongoDB, to deliver reliable and efficient solutions
- Contributed to the development of complex systems and helped to ensure project success through close collaboration with the rest of the development team.

Back End Developer

AlphaSquad

Dec 2020 - Jul 2021 (8 months)

- Successfully integrated APIs from Zoom, Google, and Stripe into multiple projects, enhancing functionality and improving user experiences.
- Built robust and scalable GraphQL APIs using AWS Amplify and Apollo GraphQL, optimizing performance and ensuring seamless serverless integration.

- Managed the backend development for three different projects for the company's clients, ensuring timely delivery and optimal functionality.
- Created and maintained an effective ETL pipeline utilizing AWS Glue, AWS Kinesis Firehose, S3, and PySpark, transforming raw data into valuable insights and enabling data-driven decision making.

Software Engineer

MTBC

Mar 2020 - Oct 2020 (8 months)

- Developed components in ReactJS for MTBC Applications.
- Created multiple Backend API's in NodeJS and Flask based on task assigned.
- Integrated BrainTree payment gateway API in NodeJS and linked with ReactJS.
- Successfully created an automated CI/CD pipeline for react application with Jenkins and github,

Education

COMSATS University Islamabad

Bachelor's degree, Computer Science

2016 - 2020

Licenses & Certifications

Deep learning fundamentals - Cognitive Class

140a8aa3c46b44f2bc45a0ed2c1f1134

Deep learning with Tensorflow - Cognitive Class

446bc26f12364f6ea309e478eab043bc

Skills

Next.js • Google Cloud Platform (GCP) • API Integration • AWS Lambda • Express.js • Full-Stack Development • React.js • GraphQL • TypeScript • Express.js
